

Chess Class

Summaries of studies of children who play chess have shown an increase in cognitive abilities such as critical, abstract and creative thinking, problem solving abilities, increases in fluency, reasoning, memory, originality and a general increase in IQ, Chess also helps to remind children that choices we make can help us or not. In short, chess is very good for the development of children's intellect and character.

Chess instruction provided by **After School Life** covers basic chess rules, basic tactics, advanced tactical training and is age, grade and skill level appropriate. All children are invited to participate, to have fun and reap the rewards and benefits of playing chess.
