LEGO after-school classes are educational programs that can help children develop a variety of skills, including:

- Creativity: Children can use their imagination to build whatever they can envision
- Collaboration: Children can work together to complete projects
- Problem solving: Children can learn to figure out how to build a model correctly
- Fine motor skills: Children can develop dexterity and hand-eye coordination by manipulating the bricks
- Social skills: Children can learn to communicate with teachers and new friends
- Independence: Children can learn to be responsible for tidying up their bricks

- STEM concepts: Children can learn about the basics of friction and torque, or about space exploration and movie-making
- Coding: Children can learn the basics of coding
- Engineering principles: Children can learn about engineering principles
- Storytelling: Children can learn about storytelling

Questions: Please email mfurr@vcs.net

Refunds are not given unless VCS cancels the program and no exchanges. Registration is not complete until your signed waiver and payment for your child(ren) has been received online.
